

# Compatible Patient Monitor Accessories Catalog

**RISING EAGLE**  
MEDICAL

## To our customers:

Thank you for entrusting us with your business. Our goal is to not only meet, but exceed your expectations as one of your trusted suppliers.

- **Product experts:** Our team's focus is on patient monitor accessories, we know these products like no one else and look forward to working with your healthcare facility on solutions.
- **9Line:** Our 9Line brand is our Made in the USA product line to help facilitate the ease of ordering products for government healthcare facilities by having these items on government contracts. We take pride in offering as many Made in the USA products as we can.
- **MEDALink:** Our other branded product line that is designed to provide cost-savings to healthcare facilities while at the same time not compromising on quality.
- **Working with us:** As a small company, we pride ourselves in being refreshingly different and easy to work with. If there is anything we can do to facilitate the ordering process with us, please let us know.

Please use this catalog to explore our own product lines, **9Line** and **MEDALink**, along with other companies that we represent.

You can find more information on each product line at our website: **[www.remsupplies.com](http://www.remsupplies.com)**.

We look forward to working with you.

# Disposable ECG Leads Catalog

Seamlessly integrate with a  
wide range of patient monitors  
100% Sourced & Assembled in USA

## Why Choose 9Line?

Rising Eagle Medical proudly offers its exclusive 9Line product line, featuring disposable ECG leads that are fully sourced and manufactured in the USA by a Service-Disabled Veteran-Owned Small Business (SDVOSB). This dedication to domestic production ensures exceptional quality, supports local economies, and creates meaningful employment opportunities for veterans. By maintaining complete control over the manufacturing process within the United States, Rising Eagle Medical delivers reliable, high-integrity products while strengthening the resilience and self-sufficiency of the American healthcare supply chain.

- Focus on High Quality Sourced Products

# Our Story

Rising Eagle Medical is a Service Disabled Veteran-Owned Small Business (SDVOSB) established in 2016 by a retired Warrant Officer (United States Army) with over 21 years of Army medical equipment management experience. The owners of Rising Eagle have combined over half a century of experience in military logistics, equipment and materials management along with extensive medical equipment and consumables sales experience. We proudly serve active duty service members, their families, and veterans across the country by providing medical consumables and healthcare solutions to government and commercial space.

## Our Mission

To establish Rising Eagle Medical as the leading SDVOSB, delivering exceptional medical products and solutions to government healthcare facilities and commercial hospitals with commitment to quality and service excellence.

## Our Logos

The **Rising Eagle** logo represents the founder's prior service as a Warrant Officer in the US Army. The eagle resembles the Warrant Officer Branch insignia known as the "Eagle Rising". The capital letters in our tagline "Managing EveryDay LOGistics" spell out "MEDLOG", the key branch we work with as a SDVOSB – Medical Logistics. We fully understand the unique challenges facing this department to ensure the correct supplies are delivered to the right place at the right time.

Rising Eagle Medical has launched **9Line** as the name for our own branded product line. 9Line is a military term used with MedEvacs to call in injuries sustained during combat or on the battlefield. It is a standardized report with 9 Lines to allow for simplicity in communication during a stressful time.

Holding true to Our Mission, 9 Line disposable ECG Leadwires are the first of its kind to be fully sourced and manufactured in the United States.

Rising Eagle Medical has launched **MEDALink** as the name for our own branded product line. MEDA – Medical Equipment and Durable Accessories – was developed to provide reliable, cost effective supply solutions for United States Healthcare facilities.
